DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- a. In claims 37-39 please change the claim dependency from "36" and insert --32--.

Allowable Subject Matter

1. Claims 1-24, 26-35, 37-46 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious a device for determining a location based on modulated light source having a lens for receiving modulated light from the light source and projecting a light pattern, wherein a processor operable to determine an identification of the modulated light source and to determine the location based on the output signal and the identification of the modulated light source, and in combination with the other recited limitations of claim 1. Claims 2-15 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 16, the prior art fails to disclose or make obvious a method for determining a location based on a plurality of light sources having the steps of projecting the

light through a pinhole lens onto a light sensing surface to produce a pattern of light on the light sensing surface and determining the location based on the pattern of light on the light sensing surface, and in combination with the other recited limitations of claim 16. Claim 17 is allowed by the virtue of dependency on the allowed claim 16.

Regarding claim 18, the prior art fails to disclose or make obvious a method for determining the position of a device having the step of projecting the light onto a light sensing surface to form a projected image and receiving a signal from the light sensing surface, the signal being indicative of the position of the projected image on the light sensing surface, then determining the position of the device from the signal and the stored information and then transmitting the position of the device to other devices in a network of devices, and in combination with the other recited limitations of claim 18. Claims 19-24, 26-31 are allowed by the virtue of dependency on the allowed claim 18.

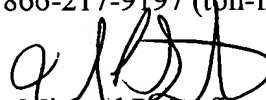

Regarding claim 32, the prior art fails to disclose or make obvious an object location system having a lens for receiving light from the first light source and projecting a light pattern; one or more additional light sources located at additional positions and a processor responsive to the output signal, wherein the processor is operable to determine the position of the detection device from the output signal and the known position of the first light source and wherein the processor is operable to determine the position of the detection device from the output signals due to each of the first and additional light sources and the first and additional known positions of the light sources, and in combination with the other recited limitations of claim 32. Claims 33-35, 37-46 are allowed by the virtue of dependency on the allowed claim 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Stafira whose telephone number is 571-272-2430. The examiner can normally be reached on 4/10 Schedule Mon.-Thurs..
